trary power—loves to play the petty despot—it is time for the people to tremble for their liberties. Even in the worst times in English history, during the last three hundred years there has been a glorious theory of personal independence which was beautifully set forth once by Chutham, in-one of his proudest exhibitions of eloquence. He spoke of the freedom and independence of the English peasant, and said that "his very mud-wall hut was his castle; it might lee shattered so that the wind might enter there, but the King of England dare not." Why? Because he is protected by the strong and impartial rampart of law, and that is the highest principle and the crowning glory of the government of this country, that a man may look into a book and read his rights and obligations and not look into the and obligations and not look into the model of the country that a man may look into a book and read his rights and obligations and not look into the public country.
